***“PDF Print Automation
FreeFlow XPIF Job Ticketing Solution”***

Accelerates **High Value** Print Volumes on
Xerox Digital Color Presses
and High Volume Production Printers

iGen3, DocuColor, DocuTech, Nuvera, 41XX EPS

“Intelligent, Variable Printing in 10 Minutes or Less”

“*PDF is a File Format*”

PDF Print Workflow Pain Points

- LCDS/PCL/Postscript/VIPP are page description programming languages. These allows insertion of commands to select multiple-stocks, insert slip sheets, tabs, subset finishing, and subset offset.
- **The Pain: PDF is a File Format – not a programming language. It does not allow insertion of any job processing commands.**

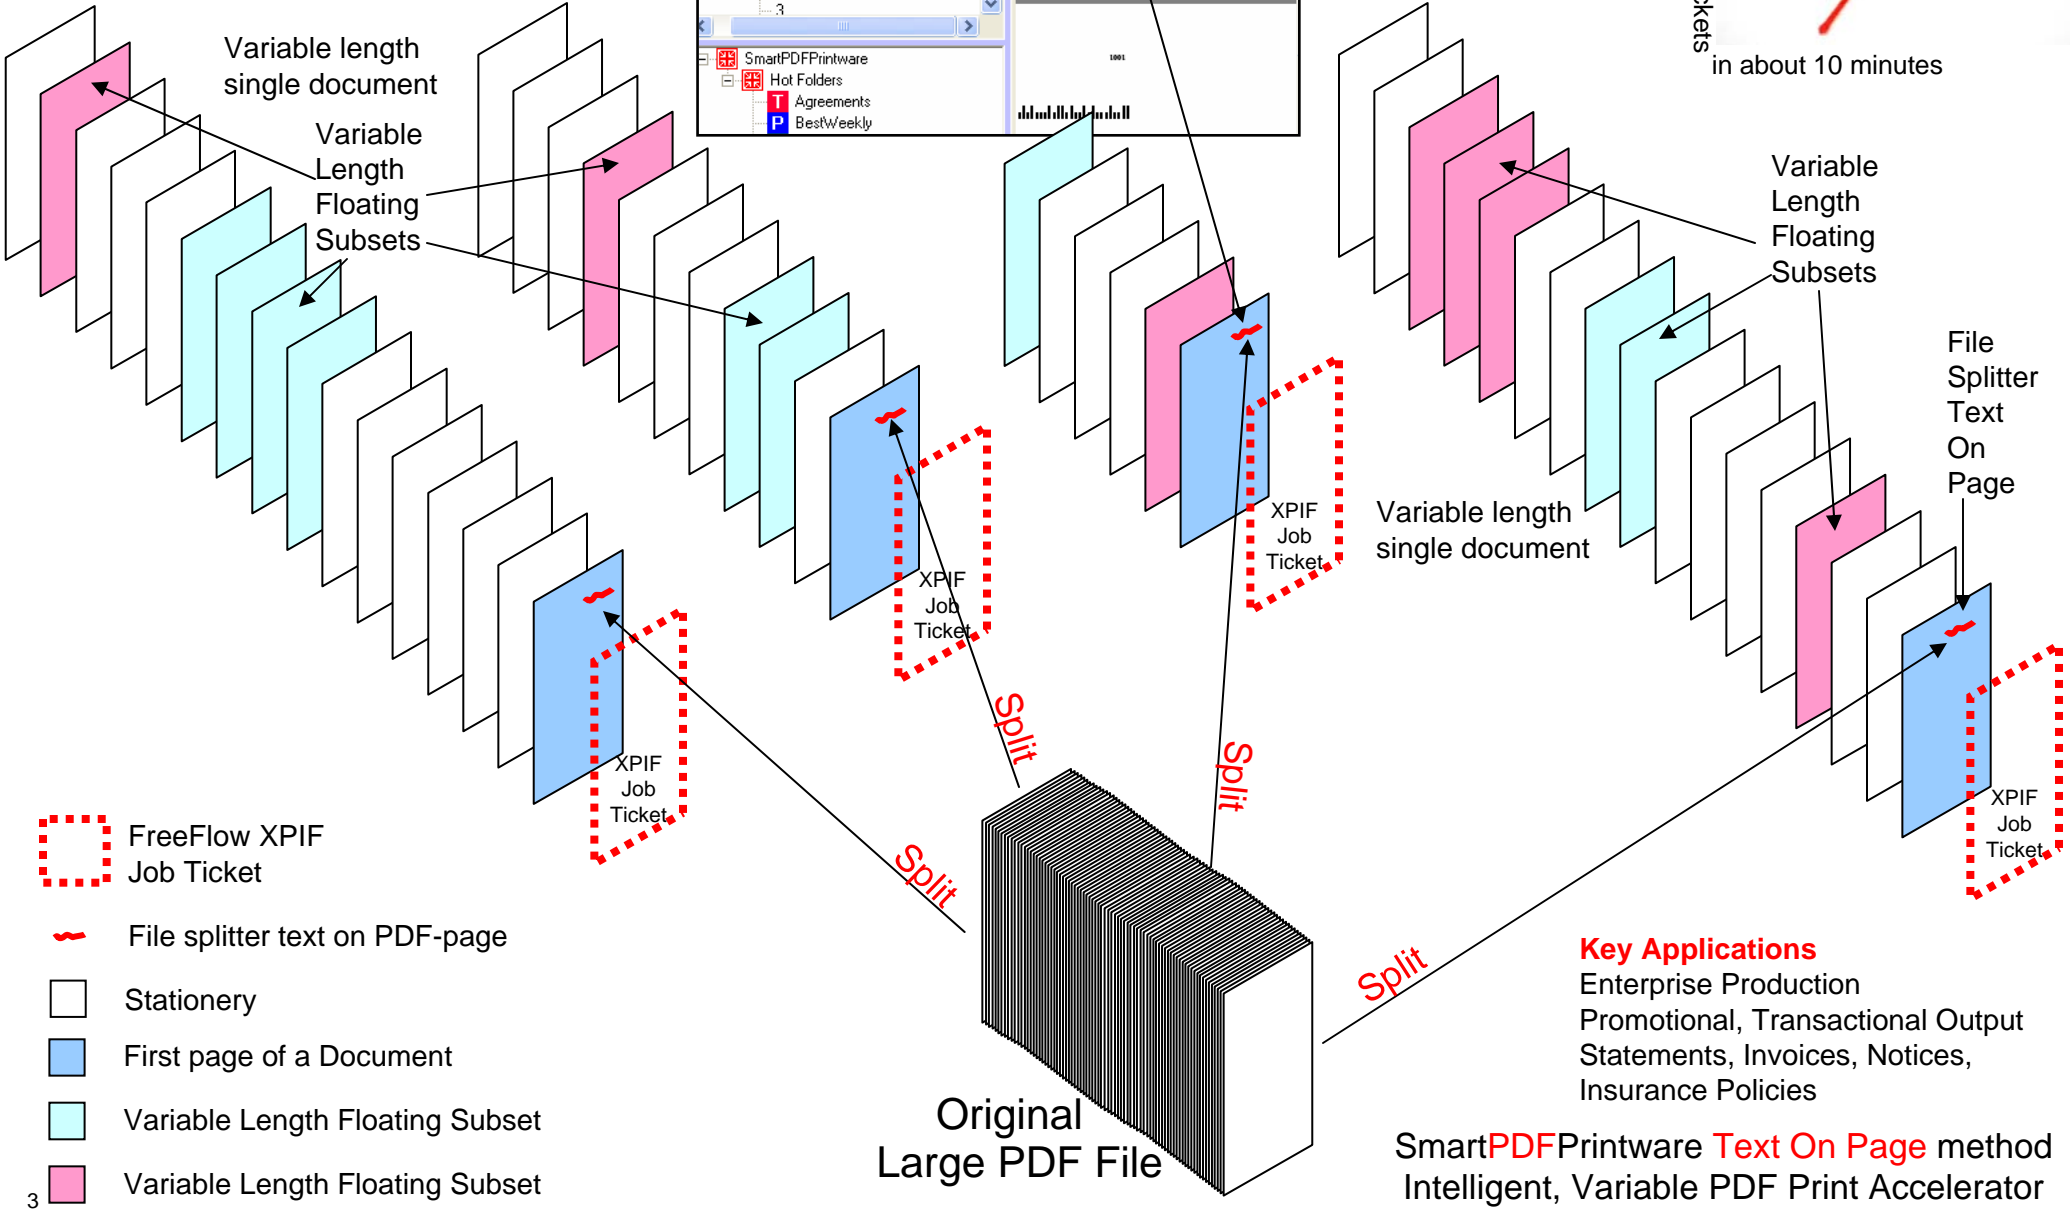

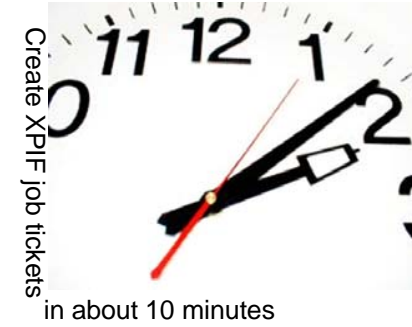

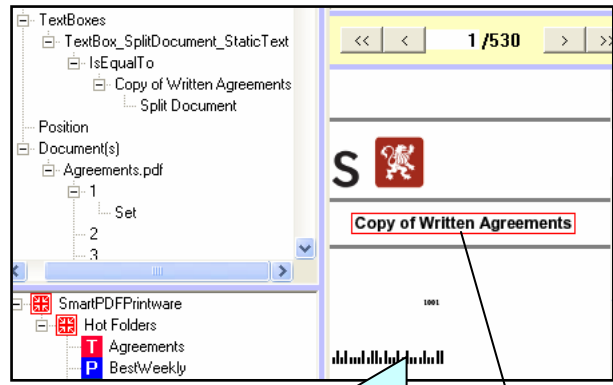

Hence users are forced to :

- Write “one-off” custom Postscript Print Program to insert PPD ‘setpagedevice’ operators; or write VIPP script
- Print mixed-size, multiple stock PDF job in parts and manually collate it
- Convert PDF to raster (RDO) losing integrity of input PDF
- Spend days on page exception and subset programming

SmartPDFPrintware relieves PDF print workflow pain by dynamically creating FreeFlow XPIF job tickets for intelligent, variable printing using one of three automation methods

- Text On Page
- File Name
- Position

Text On Page Split, Variable Length Floating Subsets, Subset Finishing, Select Media

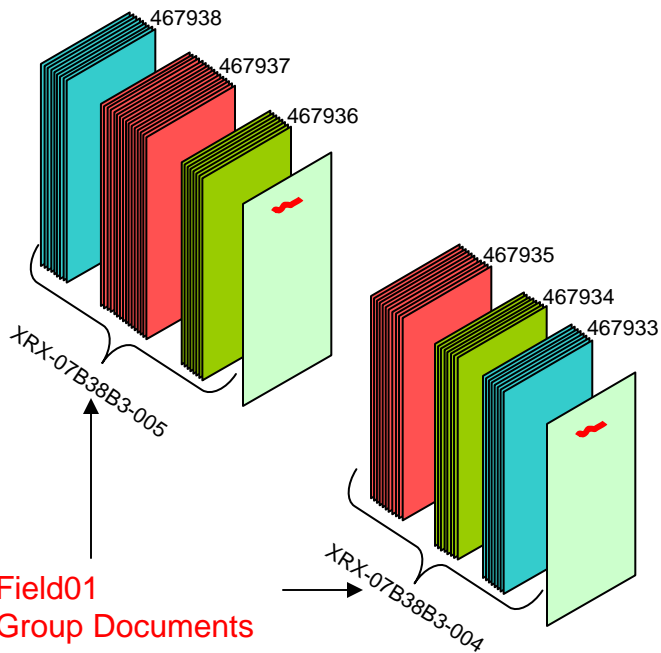

-  FreeFlow XPIF Job Ticket
-  File splitter text on PDF-page
-  Stationery
-  First page of a Document
-  Variable Length Floating Subset
-  Variable Length Floating Subset

Key Applications
 Enterprise Production
 Promotional, Transactional Output
 Statements, Invoices, Notices,
 Insurance Policies

SmartPDFPrintware **Text On Page** method
 Intelligent, Variable PDF Print Accelerator

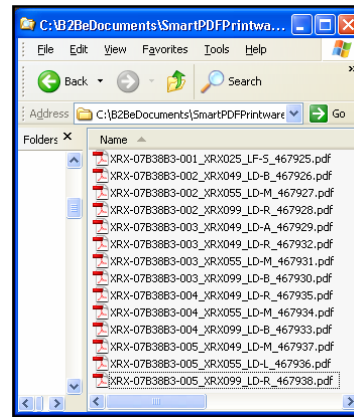

File Name

Control Group, Print Sequence
 Select Media, Simplex/Duplex,
 Finishing, Quantity, Slip Sheet, Banner

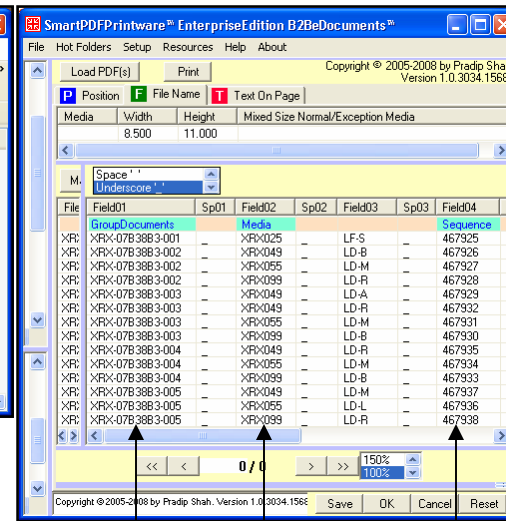

Field01
 Group Documents

- Text – Order ID
- Banner Page – Order ID
- Field02 Media Selection**
- XRX025 - Stationery
- XRX049 – 8.5x11, Red, Labels
- XRX055 – 8.5x11, Green, Plain Paper
- XRX099 – 8.5x11, Blue, Custom099

Position Subsets, Page Exceptions

Load PDF(s)		Print	MixedMedia		
P	Position	F	File Name	T	Text On Page
Width	Height	Mixed Size Normal/Exception Media			
8.500	11.000	Letter (8.50" x 11"), White, Plain Paper, , Flip on Long Edge			
8.500	14.000	Legal (8.50" x 14"), White, Plain Paper, , One Sided			
11.000	17.000	Tabloid (11" x 17"), White, Plain Paper, , One Sided			
11.000	8.500	Letter (8.50" x 11"), White, Plain Paper, , Flip on Long Edge			
14.000	8.500	Legal (8.50" x 14"), White, Plain Paper, , One Sided			
17.000	11.000	Tabloid (11" x 17"), White, Plain Paper, , One Sided			

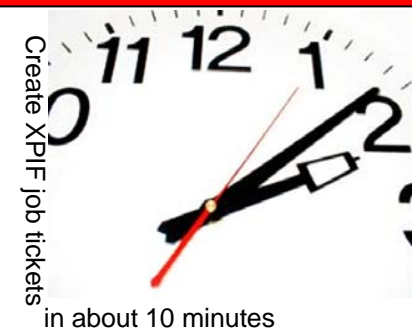

Mixed-Size Page Exception

Key Applications
 Books, Manuals, Course Packs,
 Photo Books, Catalogs

- Stationery
- Slip Sheet
- mixed-size media, page exception
- mixed-size media, page exception
- Precut Tab

SmartPDFPrintware **Position** method
 Intelligent, Variable PDF Print Accelerator

Intelligent, Variable PDF Print Accelerator SmartPDFPrintware Ensures Better Bottom Line

- Enables **intelligent, conditional**, FreeFlow XPIF job ticket creation for variable document production
- Reduces pre-press set up times of most complex jobs to 10 minutes or less, resulting in faster turn around
- **Eliminates** custom “one-off” Postscript print programs
- PDF is **not converted** to raster image, maintains integrity of input PDF.
- **Automatically** collates mixed-size, multiple stock output
- **Automatically** controls print order and print sequence
- **Makes user independent** to take on high value-added jobs
- Minimum skill operator can master SmartPDFPrintware within 4 hours

For

xerox

Presses and Printers

Learn in detail how SmartPDFPrintware solves most complex PDF workflow problems in about 10 minutes
